6th PLASTIC RECYCLING CONFERENCE ASIA 2026

Driving Breakthroughs in Plastic Recycling

VIVANTA NEW DELHI, DWARKA

Service Road, Sector 21 || Dwarka || New Delhi, Delhi – 110077

29-30th APRIL 2026

ABOUT THE CONFERENCE

Building on 5 successful editions, PRCA brings together recyclers, brand owners, technology providers, policymakers, and investors to address key market, technology, and regulatory challenges. The two-day conference covers recycling innovations, EPR frameworks, quality standards, sustainability metrics, and global trade of recyclates, alongside the *PRCA Awards & Recognition Ceremony. Organised under the **PolyMint* platform, PRCA 2026 enables meaningful dialogue, collaboration, and actionable insights to support the transition toward a resilient and scalable circular plastics economy. PRCA 2026 will also offer high-impact branding, lead generation, and partnership opportunities for sponsors and exhibitors seeking strong industry visibility.

GLOBAL

FACTS & FIGURES

Global plastics production:

Over 450 million tonnes per year (modern-era high), reflecting steep growth since 1950. Source: Our World in Data. (Citation: Our World in Data — Plastic production dataset).

Global recycling performance:

Only around 9–10% of plastic waste is effectively recycled; much of collected material is contaminated or downcycled. Source: OECD / UNEP analyses. (Citation: OECD/Global Plastics Outlook and UNEP briefs)

Global recycled-plastics market value (services & traded recyclates): **estimated at ~USD 26.6 billion in 2023** (plastic recycling services market), with forecasts showing a high-single-digit CAGR to 2030. Source: Grand View Research / MarketsandMarkets. (Citation: Grand View Research – Plastic Recycling Services Market 2023–2030).

Growth drivers: strong packaging demand, rising EPR commitments, brand targets for recycled content, and investment in advanced recycling technologies (chemical recycling, depolymerization, solvent-based recovery).

As Virgin resin prices fluctuate, demand for quality recyclates increases; brand commitments to recycled content are driving off-take agreements and investment in domestic recycling capacity.

Policy momentum (national EPR programs and global treaty negotiations) is accelerating infrastructure finance and private-sector engagement.

**FACTS
&
FIGURES**

ASIA'S FACTS & FIGURES

01

Asia-Pacific share of global plastics production: the Asia-Pacific region produces just over half of the world's plastics (**≈52% of global production in recent years**), led by China. Source: regional analyses (ERM / academic reviews). (Citation: ERM / academic reviews on regional production share).

Country Highlights :

04

China: largest producer and consumer within the region; major shifts in policy since the National Sword policy and large domestic recycling investments.

06

Production concentration: with over half the world's plastics produced in Asia, regional recycling capacity, standards, and trade flows will shape global recycle markets and prices.

02

Regional recycling performance: effective recycling rates in Asia-Pacific vary widely (**roughly 6–19% depending on country**), with an APT (Asia-Pacific) **average near 12%** effectively recycled in recent assessments. Source: OECD Regional Plastics Outlook. (Citation: OECD Regional Plastics Outlook for Southeast & East Asia).

05

Southeast Asia: rapid growth in consumption and recognized as a critical region for improving collection and preventing mismanaged waste that ends up in rivers and oceans.

07

Large opportunity: scaling mechanical and advanced recycling in Asia offers the biggest single opportunity to reduce global mismanaged plastic flows and create industrial value chains.

03

Asia recycled-plastics volumes and projections: several market analyses estimate that recycled-plastics tonnage and market value in APAC are growing rapidly — driven by regional investments, policy targets, and large-scale collection initiatives. Some sources report APAC recycled volumes in the multiple tens of millions of tonnes annually and high single-digit CAGR forecasts to **2030**.

INDIA'S SNAPSHOT & OPPORTUNITIES

01

India recycled volumes: market estimates vary, with recent reports suggesting India recycled between **~9.9–10.9 million tonnes** (2023–2024 range) and projections showing robust growth to mid-2030s as policy and private investment scale.
(Sources: IMARC, industry reports).
(Citation: IMARC / industry reports on India recycled volumes).

02

Market value: estimates for India's plastic recycling market range by source (**USD 3.8–4.2 billion in recent years**) with growth driven by brand pledges, EPR compliance activity and scaling of collection networks.

OPPORTUNITIES FOR DELEGATES & EXHIBITORS

01

Secure buyer - supplier contracts for recycled resin offtake.

02

Discover new machinery and process technologies (mechanical and chemical).

03

Explore financing and investment partnerships for scaling plants and MRFs.

04

Engage with brand owners on closed-loop projects and food-grade rPET pathways.

05

Network with policy-makers and industry associations to influence standards.

WHY
ATTEND ?

EXPLORE
next-generation recycling technologies.

FOSTER
partnerships and investments.

UNDERSTAND
evolving regulations and EPR frameworks.

PROMOTE
innovation and entrepreneurship.

ACCELERATE
adoption of recycled materials.

STRENGTHEN
recycling infrastructure and capacity.

ABOUT ORGANISER

PolyMint is the polymer-focused sister concern of BigMint, built on BigMint's globally trusted framework for price reporting, market intelligence, and industry engagement. Leveraging BigMint's IOSCO-aligned ****Price Reporting Agency (PRA)** methodology, PolyMint delivers transparent price assessments, market insights, analytics, and strategic intelligence dedicated to the polymer and plastics value chain. In addition to data-driven intelligence, PolyMint curates high-impact industry platforms such as the **Plastic Recycling Conference Asia (PRCA)**, connecting recyclers, producers, brands, policymakers, and technology providers to drive informed decision-making, collaboration, and sustainable growth in global plastics and recycling markets.
